AqBanking-Version:	5.10.1		

Beschreibung

While working on getting vcpkg building under MSVC with VCPKG (<https://github.com/microsoft/vcpkg/pull/26363>), aside of number issues already fixed, I stumbled upon a whole bunch of preprocessor issues.

These are most likely caused by the macros usage and the _p headers.

Reporting this a placeholder for either when I have time to fix this, or hopefully for someone from the project more familiar with the codebase and its intricacies to look into.

A complete build output is attached.

- Thema wurde von (MSVC, Windows, vcpkg): preprocessor errors zu (MSVC, Windows, vcpkg): Gwenhywfar preprocessor errors geändert

#2 - 18.08.2022 00:26 - wrobelda

FYI, the complete logs for the whole CI run can be downloaded from here:

https://dev.azure.com/vcpkg/public/_build/results?buildId=76620&view=artifacts&pathAsName=false&type=publishedArtifacts

Right click on the three dots next to "failure logs for x64-windows" to download the artifacts archive.

#3 - 25.08.2022 22:40 - wrobelda

This can be closed as I managed to build with vcpkg using clang-cl.

#4 - 26.08.2022 08:35 - ipwizard

- Status wurde von New zu Closed geändert

Closing as requested by OP
