

AqBanking - Bug #318

aqbanking 6.7.0beta: implicit declaration of function 'AB_Transaction_SetVopResult'

15.10.2025 22:28 - laforge

Status:	Feedback	Beginn:	15.10.2025
Priorität:	High	Abgabedatum:	
Kategorie:	AqBanking		
Betriebssystem:	Linux	Anwendung:	aqbanking-cli
AqBanking-Version:	6.7.0beta	Version der Anwendung:	

Beschreibung

I can't get 6.7.0beta (git-describe calls it 5.6.10-1812-g1b2a3b2c) to build at all:

```
make[8]: Entering directory '/crypt/space/home/laforge/projects/git/aqbanking/src/libs/plugins/backends/aqhbci/admjobs'
/bin/bash ../../../../../../libtool --tag=CC --mode=compile gcc -DHAVE_CONFIG_H -I. -I../../../../../../../../src/libs -I../../../../usr/include/gwenhywfar5 -I../../../../ -I../../../../joblayer -I../../../../msglayer -I../../../../banking -I../../../../applayer -I../../../../tan -I... -DBUILDING_AQBANKING -fvisibility=hidden -g -O2 -g -Wall -Wdeclaration-after-statement -MT jobvpp.lo -MD -MP -MF .deps/jobvpp.Tpo -c -o jobvpp.lo jobvpp.c
libtool: compile: gcc -DHAVE_CONFIG_H -I. -I../../../../../../../../src/libs -I../../../../usr/include/gwenhywfar5 -I../../../../ -I../../../../joblayer -I../../../../msglayer -I../../../../banking -I../../../../applayer -I../../../../tan -I... -DBUILDING_AQBANKING -fvisibility=hidden -g -O2 -g -Wall -Wdeclaration-after-statement -MT jobvpp.lo -MD -MP -MF .deps/jobvpp.Tpo -c jobvpp.c -fPIC -DPIC -o .libs/jobvpp.o
jobvpp.c: In function '_applySingleVopResultToTransfer':
jobvpp.c:331:7: error: implicit declaration of function 'AB_Transaction_SetVopResult'; did you mean 'AB_Transaction_SetTaxes'? [-Wimplicit-function-declaration]
  331 |         AB_Transaction_SetVopResult(t, sResultString);
      |         ^~~~~~
      |         AB_Transaction_SetTaxes
make[8]: *** [Makefile:573: jobvpp.lo] Error 1
```

and indeed, it seems this function is only ever called but not declared/defined anywhere:

```
$ git grep AB_Transaction_SetVopResult
src/libs/plugins/backends/aqhbci/admjobs/jobvpp.c:         AB_Transaction_SetVopResult(t, sResultString);
```

It looks like some code is needed but wasn't merged to master before making the tag?

I wanted to build 6.7.0beta, try it (particularly with the VOP opt-out / HKVOO) and report how far I get with Deutsche Bank

- Status wurde von New zu Feedback geändert

Please try

```
make typedefs
make types
```

BTW: opt-out is not implemented and probably never will be since you can still ignore the result of VOP when using opt-in.
