AqBanking-Version:	6.7.10beta		
Beschreibung			
I'm trying to get the GNUcash flatpak maintainers to release a version that restores getting transactions from several German banks, but they say that they don't package beta versions in stable flatpaks https://github.com/flathub/org.gnucash.GnuCash/issues/104#issuecomment-3590163484 Do you think, pushing out a non-beta 6.7 would be doable?
