Beschreibung

With the attached patch, the settings dialogs of aqbanking get a new tab called "Info," which provides useful information for users, e.g., to help with troubleshooting.

The patch depends on <https://www.aquamaniac.de/rdm/issues/330>, is based on commit 989c337b and has been compiled without any problems in an out-of-source build.

In the future, further entries may be added to this page, such as the version number of aqbanking and statistical figures such as the number of accounts, users, blocked accounts, etc.

Followup for <https://www.aquamaniac.de/rdm/issues/323>

What a nice idea, indeed!

And now I see how you came across the read-only lineEdit widget bug ;-)

Thanks, applied to git.
