

AqBanking - Bug #332

xmllint: 0BUILD:1: parser error : XML declaration allowed only at the start of the document

09.12.2025 15:45 - rhabacker

Status:	Closed	Beginn:	09.12.2025
Priorität:	Normal	Abgabedatum:	
Kategorie:		Anwendung:	andere
Betriebssystem:	FreeBSD, Linux, MacOSX, Windows, andere	Version der Anwendung:	
AqBanking-Version:	6.8.2		

Beschreibung

aqbanking includes configuration files for gwbuid. Simply running xmllint to perform a raw validation check git fails with:

```
$ cd ~/src/aqbanking
$ xmllint 0BUILD
0BUILD:1: parser error : XML declaration allowed only at the start of the document
<?xml?>
^
The appended patch, which is based on commit 989c337b fixes those issues.
```

thanks, applied to git.

Just for clarification: Those files are never read by any other XML parser than that of Gwenhywfar (which wouldn't even need the <XML> element), but it's nice to know that they could be now ;-)

Extensions in the build system in aqbanking would also have to be available in gwbuid, so in my opinion it makes sense to have a syntax checking option for the 0BUILD files.

Yes, it certainly does.

Thanks again.
